

MohammadHosein Ebrahimi

Back-End / Full-Stack Engineer

✉ e.mohamadhosein@gmail.com 🔗 Website  LinkedIn  Github

Summary

Backend-focused Full-Stack Engineer with **3+** years of experience delivering production systems across **fintech**, **blockchain**, and **SaaS** platforms. Specialized in **API architecture**, **Web3 wallet integrations**, and **scalable backend** services using **PHP**, **Node.js**, **Symfony**, **Laravel**, and **NestJS**. Delivered **100+** production tasks, built Node.js blockchain data pipelines, and improved test coverage by **70%** across complex **Symfony/Vue.js** codebases.

PROFESSIONAL EXPERIENCE

- | | |
|---|--|
| Full-Stack Developer , <i>ABC Hosting Ltd.</i>
<i>Short-term modernization contract — legacy PHP → Vue.js + Docker stack.</i> <ul style="list-style-type: none">Accelerated frontend delivery by migrating a monolithic legacy UI to a component-based Vue.js architecture, reducing page load time by 85% and unblocking the team from years of UI debt.Improved deployment consistency and eliminated environment-specific bugs by containerizing the full application stack with Docker, cutting setup time from 2.5 hours to under 15 minutes.Expanded addressable market to 7 countries by implementing multilingual and multi-currency support with automatic location-based currency detection. | 11/2025 – Present
Belize City, Belize |
| Full-Stack Developer , <i>Mintme.com</i>  <ul style="list-style-type: none">Increased JavaScript unit test coverage by 70% across the Symfony/Vue.js codebase by introducing structured testing practices and refactoring untested legacy modules — directly reducing regression incidents.Built a Node.js blockchain data pipeline that ingested on-chain events in real time, filtered and structured payloads, and delivered them to Symfony middleware — enabling downstream processing for 1,000+ daily transactions.Engineered Web3 wallet integration supporting MetaMask, Solflare, and 6+ blockchain networks, covering 3+ authentication and transaction scenarios including edge cases across different chain states.Delivered 100+ tasks (60+ features, 40+ bug fixes) across a production Symfony + Vue.js platform, maintaining clean architecture and CI/CD-compatible code across 1,500+ GitLab commits. | 06/2024 – 12/2025
Belize City, Belize |
| AI Integration Developer , <i>ProAce CRM Project (Part-time, concurrent with Mintme)</i> <ul style="list-style-type: none">Integrated AI-powered chat and support automation into a Laravel-based CRM, reducing manual support responses by 70% and enabling real-time AI-assisted user interactions.Implemented backend logic for AI Assist, technical support automation, and in-app chat, delivering 30+ AI-powered endpoints consumed by the CRM frontend. | 06/2025 – 03/2026
Canada / Remote |
| Web Developer , <i>Heath Tourism Development Center (HTDC)</i>  <ul style="list-style-type: none">Built and maintained company websites in PHP, JavaScript, HTML, and CSS — improving organic traffic by 65% and supporting the center's digital presence across 7 service pages.Prepared and translated educational course materials for e-commerce delivery, increasing the available online catalog by 5 modules. | 05/2022 – 09/2023
Muscat, Oman |

Projects

Personal Portfolio Website, *Laravel 13, Inertia.js, React*

- Full-stack portfolio with server-side rendering via Inertia.js and a React frontend. Deployed and publicly accessible. [Visit](#) 

Reservation Microservice System, *NestJS, Docker, MongoDB, Stripe*

- Microservice platform with independent auth, payment, reservation, and DB services. Demonstrates CI/CD-friendly containerized architecture and event-driven service communication. [Link](#) 

Finance Manager, *Laravel, Vue.js, Inertia.js, MySQL*

- Full-stack app for tracking income, expenses, and financial records across categories with a dynamic Vue.js dashboard. [Link](#) 

Real Estate SPA, *Laravel 12, Vue.js, Inertia.js*

- Single-page property platform supporting listings, buy/sell workflows, and bidding functionality. [Link](#) 

Lottery Smart Contract, *Solidity, Foundry, Chainlink*

- Decentralized lottery with verifiably random winner selection via Chainlink VRF and automated fund distribution. [Link](#) 

FundMe Smart Contract, *Solidity, Foundry*

- Built a donation smart contract supporting user funding and owner-controlled withdrawals. [Link](#) 

Task Manager REST API, *NestJS, TypeScript*

- Backend API with JWT authentication, role-based authorization, and task status workflow management. [Link](#) 

TECHNOLOGICAL SKILLS

Languages & Frameworks

PHP, JavaScript, TypeScript, Solidity · Laravel, Symfony, NestJS, Node.js, Vue.js, React, Inertia.js, Livewire

Architecture & Methodology

OOP, MVC, DDD, Clean Architecture, SOLID, Unit Testing, E2E Testing, Microservices

Learning & Development

RabbitMQ, Kubernetes, AWS fundamentals

Databases & Infrastructure

MySQL, PostgreSQL, MariaDB, MongoDB · Redis · Docker, Git, GitLab CI/CD, REST APIs

Blockchain & Web3

Solidity, Web3.js, Smart Contracts, Wallet Integration (MetaMask, Solflare), Chainlink

EDUCATION

Master of Business Administration (MBA), MA: Marketing, *Khorasgan University*

2022 – Present

Studying business strategy and marketing alongside an active engineering career — informing product thinking and client communication.

Bachelor of Science in Mechanical Engineering, BE: Solid Branch,

2015 – 2019

University of Kashan
