

MohammadHosein Ebrahimi

Back-End / Full-Stack Engineer

 e.mohamadhosein@gmail.com  Website  LinkedIn  Github

Summary

Back-End Engineer with **3+** years of experience developing scalable applications using **PHP, Node.js, Symfony, Laravel, NestJS**, and **Vue.js**. Skilled in **API** development, **blockchain** integrations, **Web3** systems, and backend architecture, with hands-on experience delivering production features, improving code quality, and building secure, maintainable systems.

CORE COMPETENCIES AND ACHIEVEMENTS

Full-Stack Development

Proficient in **PHP, JavaScript, Node.js, Vue.js, NestJS, Symfony**, and **Laravel** for comprehensive web application development.

Problem-Solving & Adaptability

A **fast learner** with strong problem-solving and troubleshooting abilities, consistently **adapting** to new challenges.

Code Quality & Reliability

Committed to writing **clean, scalable**, and **secure** code, with expertise in unit **testing** for robust solutions.

Blockchain Development

Experienced in **Solidity, Web3, Node.js**, and general crypto/blockchain development, including Web3 capabilities (wallet connection and interaction).

PROFESSIONAL EXPERIENCE

PHP/JS Developer, ABC Hosting Ltd. - Delivered 90+ development tasks including 50+ new features and 40+ bug fixes across Symfony and Vue.js applications. - Contributed 1500+ GitLab commits while maintaining clean architecture and scalable implementation practices. - Built a Node.js blockchain data pipeline that monitored on-chain events, filtered blockchain data, and passed structured payloads to Symfony middleware for downstream processing. - Developed Web3 wallet integration features supporting MetaMask, Solflare, and multiple blockchain networks. - Designed and implemented wallet connection logic covering 8+ authentication and transaction scenarios across different chains. - Investigated and resolved production-level issues, improving platform stability and reliability. Increased JavaScript unit test coverage by 50% through improved testing practices and refactoring efforts. - Collaborated within a distributed remote development team using GitLab workflows and code review processes.	06/2024 – Present Belize City, Belize
AI Integration Developer, ProAce CRM Project - Integrated AI-powered features into a Laravel-based CRM platform, including AI Assist, technical support automation, and user chat functionality. - Implemented backend logic for AI-assisted responses, chat interactions, and CRM-specific automation features. - Collaborated on improving the platform's AI capabilities to help users access smarter in-app assistance.	06/2025 – 03/2026 Remote

- Contributed to a **legacy Laravel** codebase while maintaining compatibility with existing CRM **architecture** and business workflows.

Web Developer, *Heath Tourism Development Center*

05/2022 – 09/2022

- **Developed** and **maintained** company websites using **PHP**, **JavaScript**, HTML, and CSS to improve online visibility and user experience.
- Preparing and **translating educational** and management-related course materials for **online ecommerce**.

Tehran, Iran

Projects

Personal Portfolio Website, *Laravel 13, Inertia.js, React*

- Built a personal portfolio website showcasing projects, experience, and technical skills. [Visit](#) 

Finance Manager, *Laravel, Vue.js, Inertia.js, MySQL*

- Built a full-stack finance management app for tracking income, expenses, categories, and financial records. [Link](#) 

Reservation Microservice System, *NestJS, Docker, MongoDB, Stripe*

- Developed a microservice-based reservation platform with authentication, payment, reservation, and database services. [Link](#) 

Real Estate SPA, *Laravel 12, Vue.js, Inertia.js*

- Built a single-page property platform for listings, buy/sell workflows, and bidding functionality. [Link](#) 

Task Manager REST API, *NestJS, TypeScript*

- built a backend task management API with authentication, authorization and task status workflows. [Link](#) 

Lottery Smart Contract, *Solidity, Foundry, Chainlink*

- Implemented a decentralized lottery smart contract with automated winner selection and fund distribution. [Link](#) 

FundMe Smart Contract, *Solidity, Foundry*

- Built a donation smart contract supporting user funding and owner-controlled withdrawals. [Link](#) 

Job Board Platform, *Laravel, MySQL, Blade*

- Developed a Laravel job board where employers can post job listings and users can filter roles by category, level, and other criteria. [Link](#)  [Try](#) 

EDUCATION

Master of Business Administration (MBA), MA: Marketing, *Khorasgan University*

2022 – Present

Bachelor of Science in Mechanical Engineering, BE: Solid Branch,
University of Kashan

2015 – 2019

TECHNOLOGICAL SKILLS

Languages & Frameworks

PHP, JavaScript, TypeScript, Solidity, Laravel, Symfony, NestJS, Node.js, REST APIs

Database & Tools

MySQL, PostgreSQL, MariaDB, Docker, Git, CI/CD

Frontend

Vue.js, Inertia.js, Livewire, Tailwind CSS, Bootstrap

Methodologies & Blockchain

Unit Testing, E2E Testing, OOP, MVC, DDD, Clean Architecture, Solidity, Web3, Smart Contracts, Wallet Integration
